PROFESSIONAL SUMMARY

Master's student in Artificial Intelligence at Queensland University of Technology with professional experience in software engineering and AI development. Experienced in building scalable web and mobile applications, RESTful backend services, cloud-native systems, and production AI applications. Interested to work on real world projects.

EDUCATION

Masters in Artificial Intelligence Queensland University of Technology, Australia	Expected July 2028
Bachelor of Technology in Computer Science (Cloud Computing) Vellore Institute of Technology, Bhopal, India CGPA: 8.51 / 10	May 2026

PROFESSIONAL EXPERIENCE

Gen AI LLM Engineer Intern <i>Codefeast (Remote)</i>	Sept 2025 – Present
· Authored complex multi-step instruction datasets for production LLMs, achieving a 95% quality acceptance rate. · Performed RLHF error analysis on LLM-generated API calls, improving instruction-following and tool usage.	
Software Developer Intern <i>ASolution (Remote)</i>	May 2024 – Aug 2025
· Redesigned the company website using React.js, reducing load time by 30% while ensuring full responsiveness. · Improved performance from 60 to 81 and SEO score from 74 to 92 through optimization and deployed via cPanel.	

PROJECTS

GATHR. Cross-platform Event Management Platform	React Native • Next.js • Node.js • MongoDB
• Developed a production-ready event management platform for Android, iOS, and Web using React. • Implemented OTP-based authentication, role-based access control, event creation, image uploads, QR ticket generation, QR-based attendee check-in, and integrated online payment gateway across both platforms. • Designed a score-based event recommendation algorithm with pagination, Redis caching, and reusable modular architecture; deployed the application to both Google Play Store and Apple App Store.	
PF Buddy LLM-based Policy Assistant	Mistral-7B • LoRA • RAG • FastAPI • Docker
• Fine-tuned a 4-bit quantized Mistral-7B model using LoRA for domain-specific government policy reasoning. • Built a Retrieval-Augmented Generation pipeline and vector embeddings for semantic document retrieval. • Reduced training loss by 47% and hallucinated responses by 85%; deployed scalable inference using GCP.	
Insight Engine RAG-based Document Intelligence	HyDE • TinyBERT • Pinecone • FastAPI • GCP
• Developed a HyDE-based RAG pipeline with TinyBERT cross-encoder semantic re-ranking for documents. • Improved answer accuracy by 158% and reduced repeated-query latency by 95% using multi-layer caching. • Deployed the complete system on Google Cloud Platform with GCP Cloud Run and advanced to Round 2 of Bajaj Finserv HackRx 6.0 among 46,000+ participants, placing in the top 0.5%.	

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, C++
Full-Stack Dev	React, React Native, Next.js, Tailwind CSS, Node.js, Express.js, FastAPI, REST APIs
Infra & Ops	MongoDB, MySQL, GCP, AWS, Docker, Git, Linux
AI / ML	PyTorch, TensorFlow, HuggingFace, LangChain, RAG

ACHIEVEMENTS

- Secured a top 0.5% rank among 46,000+ participants in the national Bajaj Finserv HackRx 6.0.
- Secured 2nd Runner-Up position at the competitive campus level MERNxAI coding Hackathon 2025.
- Achieved an overall official IELTS band test score of 8.0, reflecting proven strong English skills.
- Received a 25% academic Merit Scholarship from Queensland University of Technology.
